PROFESSIONAL SUMMARY

Technical consultant and web developer with experience building, improving and supporting websites for businesses, agencies and technical projects. Skilled in WordPress development, responsive layouts, hosting, DNS, email setup, technical troubleshooting and client-facing delivery. Designed, planned and developed OfferFlow, a SaaS e-signature platform built with React, Next.js, TypeScript and Supabase, deployed on Vercel from concept through to launch. Background includes infrastructure project management, technical operations and client service, supported by a BSc Informatics in progress through UNISA. Seeking development, implementation or technical consulting opportunities.

CORE TECHNICAL SKILLS

Development: WordPress development, Gutenberg/block editor, GeneratePress, GenerateBlocks, HTML, CSS, PHP fundamentals, responsive layouts, website maintenance, contact forms, Next.js, Supabase, TypeScript and React project experience.

Hosting, Domains & Email: WHM, cPanel, domain setup, DNS management, TXT records, DMARC, email account setup, Outlook configuration, hosting support and basic website migration support.

WEB DEVELOPMENT & TECHNICAL EXPERIENCE

Web Developer & Technical Consultant | Self-Employed | 2024 - Present

- Design, build and maintain responsive WordPress business websites for SME clients, including page layouts, mobile/tablet optimisation, large-screen responsiveness, content updates and website troubleshooting.
- Configure WordPress functionality; including custom post types, taxonomies, categories and structured content for project-specific requirements such as adventure listings, destinations and service pages.
- Set up and integrate website forms, SMTP/transactional email delivery and CRM/newsletter workflows.
- Support basic technical SEO and site visibility setup, schema-related fixes, sitemap checks and Google Search Console monitoring.
- Work with lightweight WordPress themes, GeneratePress, GenerateBlocks, the block editor and selected plugins.
- Configure domains, hosting, WHM/cPanel accounts, DNS records, email accounts, TXT records, DMARC and related email-deliverability settings.
- Provide client technical support, including Outlook/email setup, website troubleshooting, hosting support and general website maintenance.
- Developed business websites for clients including Kartula Adventures, COBS Africa, The Finance Block, Letlapa Granite and Amabrick.
- Designed and developed OfferFlow, a SaaS e-signature platform built with React, Next.js, TypeScript and Supabase. Led the product concept, workflow design, feature planning, testing and implementation, using AI-assisted development tools as part of the build process while reviewing, directing and refining the codebase throughout.

ADDITIONAL TECHNICAL / PROJECT EXPERIENCE

Safari & Adventure Tour Guide / Operations Coordinator | Kartula Adventures | Contract | 2024 - 2025

- Coordinated and guided multi-day safari and adventure experiences for international hunting clients, managing itineraries, transport, accommodation, bookings and client communication.

Diesel Depot Manager | BPD Fuels | 2022 – 2023

- Managed daily depot operations, inventory reconciliation, logistics coordination, reporting, staff supervision and safety/compliance requirements.

Senior Field Technician / Technical Specialist | LST Comms | 2019 - 2022

- Delivered residential and commercial FTTH installations, fibre splicing, OTDR/iOLM testing, fault finding and CAT5/6 cabling support.

Director | OFX (Self-Owned Company) | 2017 - 2019

- Managed a small telecommunications contracting business, including client communication, quotations, compliance documentation, contractor coordination and operational planning.

Project Manager / Site Manager - Fibre Optic Infrastructure | Fibre Optic Installations | 2009 - 2017

- Managed technical infrastructure projects involving site surveys, route planning, BoQ preparation, contractor coordination, stakeholder communication, QA checks and project handover documentation.
- Worked with technical drawings, fibre diagrams, project documentation, MapInfo/GIS route updates, OTDR test results and as-built records.
- Coordinated with clients, engineers, site inspectors, contractors, property managers and technical teams to deliver infrastructure projects according to scope and quality requirements.
